

# We have upgraded our Full-Color Digital Printing Capabilities!

**The Konica Minolta's bizhub PRO C6501** is the ideal solution for commercial print businesses to handle short-run, on-demand jobs. It excels in transactional environments that require high speeds for quick job turnaround, large paper and output capacities for automated long-run operation, the ability to run diverse substrates, thorough finishing capabilities, and above all, reliability and durability.

**Exceptional Image Quality** 1800 dpi (equivalent) × 600 dpi output resolution is just one example of the C6501's superiority. Adopting the Simitri HD polymerised toner with smaller and more uniform particles, lines become finer, and characters are cleaner. An exclusive laser exposure control, dot position control, multi-bit screen, and text enhancement bring fine-line precise text reproduction. High registration accuracy, image alignment, and precise adjustments of image position and magnification are available as well. CRS (Colour Retention and Stability) technology continuously monitors the status of the main body, and makes adjustments according to changes in the print environment to offer stable image quality without colour aberration—even during long-run printing.

**Media Flexibility** - Paper sizes up to 13"x19" and weights from 64-256g/m<sup>2</sup> (64-300g/m<sup>2</sup> are supported). The C6501 also features exclusive technologies to improve the reliability of heavy and coated stock paper feeding.

**Flexible Print Controller** - Offering high productivity and automation, outstanding colour image quality, compatibility with graphic arts systems, and useful features such as variable print, these print controllers are perfectly suited to the complex demands and varied requirements of any professional production environment.
